

# **STRAITS TIMES STRENGTH**

*By Daryl Guppy*

The Straits Times has developed into a strong breakout following a classic test and retest GMMA breakout pattern. In this bullish environment traders buy on the dips in anticipation for a continuation of the uptrend. This is not a market to short.

However, managing volatility remains a challenge. Our preferred ATR and CBL methods are delivering inconsistent results. In contrast the Darvas trading method is delivering better results and we add another example of this trade method in this week's newsletter.
