

**2015 Schedule  
Continuing Education  
Programme**

**For Dealers & Remisiers**

## Introduction

This SGX-accredited programme offers Trading Representative a wide array of relevant and practical short courses. Through continuing education, we aim to raise the level of professionalism and competency, while improving the business of Dealers and Remisiers.

Each course is 3 hours and is mostly delivered through the conventional classroom or seminar mode at Capital Tower (Robinson Road), SGX Centre (Shenton Way) or a convenient location within or near Central Business District. The course schedule and course synopsis are detailed in the following pages. The tentative dates for each course are pre-assigned for the convenience of Trading Representatives. The course lecturers' bio-data are also provided for your reference. The dates and lecturers are subject to changes. Registered participants will be informed of any changes in venue/date at least 10 business days before the commencement of the course, where possible.

## SGX- Training Credits

All participants have to sign in before the commencement of the course, and participants who are more than 10 minutes late will not be allowed to mark their attendance, and no credits would be awarded. In addition, participants also need to sign out after the completion of the 3- hour programme.

SGX requirements on minimum training credits per calendar year, punctuality, signing of attendance register, attendance, attire, and other rules will be strictly adhered to.

## Course Registration

The Enrolment Form is enclosed in this catalogue, and is also available from the administrative departments of all SGX-Securities Trading Member Companies. Please enrol through your respective administration departments.

Applications should reach our Education Centre at least 10 business days before the commencement of the applied courses. The fee is S\$110 per course (no GST) unless otherwise specified. Corporate Discounts are available. For changes, refunds or cancellations, terms and conditions in the enrolment form apply.

## Information & Feedback

We welcome any ideas or suggestions that could help us improve on this Continuing Education Programme.

### **SRS 1: Six Numbers All Investors and Their Brokers Must Know (Mr Peter Lai & Mr Puah Soon Lim – 30 January 2015)**

All investors love a good story. They like to hear how business owners start a business, expand it and make a lot of promises about how great the company will be in a few years' time. The trouble with story is that it is not easy to test the credibility of those promises. Basically, businesses need to generate sales and collect receivables in order to survive, and make a profit in order to grow. How can investors know that a business is doing the right thing to survive and grow? How can you as a broker advise your clients that their hard-earned savings are entrusted to management who intend to and are capable of fulfilling their promises? This short course provides participants with a practical knowledge and hands-on application of six key financial numbers. These numbers form a set of powerful tools in constructing buying or selling decisions for brokers and/or their clients.

These six numbers are:

- The Compound Annual Growth Rate (CAGR)
- The Price/Earning Ratio (PER) or its reciprocal, the Earning Yield (EY)
- The Dividend Yield (DY)
- The Enterprise Value/Earning Before Interest, Tax, Depreciation & Amortization Ratio (EV/EBITDA)
- The Price to Book Ratio (P/BV)
- Free Cash Flow (FCF)

Case studies will be used to illustrate on how these six numbers can be used together to identify good and bad companies and test the credibility of the promises made by management.

### **SRS 2: Economic Indicators & Forecasting (Dr Tan Kee Wee – 27 February 2015)**

This is a short revision course on what economic data and indicators to look out for. This is important because taking note of the right indicators should help the investor with his investment decisions.

- Inputs used for economic forecasting and the factors affecting it
- The impact of different macroeconomic factors on the stock market
- Shocks in the economy and its long-term implications
- Strategies for different economic scenarios
- Illustrations from the Singapore economy

### **SRS 3: Be Your Own Portfolio Manager (Mr Benjamin Goh – 11 March 2015)**

After attending this short course, participants will be able to:

- Describe the tops-down and bottoms-up approach
- Interpret the business cycle and economic indicators
- Identify the assets and securities appropriate for a client
- Demonstrate the ability to create a custom-made portfolio for a client
- Explain the process of portfolio optimization
- Calculate and interpret the Sharpe ratio, Treynor measure and maximum drawdown
- Explain the process of performance attribution
- Identify effective communications channels to a client
- Demonstrate the ability to make portfolio recommendations to a client
- Demonstrate the ability to create a portfolio proposal for a client

### **SRS 4: Developing a Trading Strategy in Derivatives (Mr Wong Kon How – 8 April 2015)**

Learn to how to devise and implement your trading strategies through:

- Knowing the Fundamentals in trading
- Technical studies
- Trade management
- The following will be discussed:
  - Leverage instruments and its attributes for trading
  - Importance of using technical studies in trading
  - Illustration on how to apply “Precision Entry” to initiate a trade
  - How to manage your trading fund

If you are new to Futures trading, this workshop aims to equip you with knowledge to formulate a trading plan. If you are already trading, this workshop will help you refine your trading strategies.

### **SRS 5: Understanding the Breakout Phase of Market Behaviour (Mr Jeffery Tie – 8 May 2015)**

This course will look specifically at how markets behave when they successfully exit, or break out of the sideways range, changing from a resting mode into a directional impulse. The aim is to learn how to identify the conditions under which successful breakouts can occur. This requires the use of a moving average to identify the timeframe of the market trend, and then to learn how to look out for the higher timeframe perspective.

The student is taught to locate the significant swing highs and swing lows within the correction phase. Once this can be done, the student is taught to observe the market action when prices breaks out of the sideways top and to the sideways bottom. Oscillator tools will be used to measure the strength of the breakout so that the trader can enhance and improve the success rate in the trading the breakout.

### **SRS 6: ETF Investment Strategies** **(Mr Tolmas Wong – 17 June 2015)**

ETFs are the fastest growing; investment innovation in the recent decade. We can better manage our wealth by constructing an ETF-based portfolio for a variety of risk appetites or market environment.

Course participants will learn about:

- The evolution of ETF landscape: From market capitalization to Fundamental weighting
- Key advantages of using ETFs
- ETF investment strategies: Value, Sector, Volatility, Alternatives, Leverage & Inverse ETFs
- Constructing ETF-based investment portfolios to achieve your financial goals
- Leveraging on the range of ETF products available to improve your trading outcomes
